Abstract-

Each year, it's estimated that more than one million adoptable pet are euthanized in the world, simply because too many pets come into shelters and too few people consider adoption when looking for a pet.

If you buy a pet from a pet store online seller or flea market, you're almost certainly getting a pet from a pet mill.

Pet mills are factory-style breeding facilities that put profit above the welfare of pets. Animals from pet mills are housed in shockingly poor conditions with improper medical care, and are often very sick and behaviorally troubled as a result. The moms of these pets are kept in cages to be bred over and over for years, without human companionship and with little hope of ever joining a family. And after they're no longer profitable, breeding pets are simply discarded—either killed, abandoned or sold at auction.

These puppy mills continue to stay in business through deceptive tactics — their customers are unsuspecting consumers who shop in pet stores, over the Internet or through classified ads. Pet mills will continue to operate until people stop supporting them. By adopting a pet, you can be certain you aren't giving them a dime.

I. INTRODUCTION

What is Hold My Pet ?

Hold My Pet connects pet owners with trusted local people who would love to look pets. We make it easy to arrange walks, playtime, overnight stays or holidays. Our aim is to help pet owners when they need it, & give pet more exercise and playtime and to allow people without a pet to spend quality time with one.

Hold My Pet connects pet lovers with pet owners just like you in all major cities & can help you get a loving trusted Pet sitter who can board your dogs & cats in moments after you make a request.

Hold My Pet lets you share and show off your dog & cat photos or hire trusted Pet

Sitter for boarding, minding, walking, and daycare. The concept is simple, use Hold My Pet to get people to take care of your pet when you not available, or earn extra money with your love for animals.

Hold My Pet aims to create a community for pet parents, lovers, and pet finder to care for each other pets, which can be kitties, doggie, hamsters. Hold My Pet is especially useful when going to airport for a holiday & looking for minders to take care or feed your pets. Use Hold My Pet today, don't let your cats & dog rover around or become mad paws by caging them, give your cat & dog a vacay too

II. PROBLEM STATEMENT

Every animal lover has a dream to have a pet and spend quality time with it. But due to owners Busy schedule ,jobs , or any other work the pet owner is not able to spend time with their pets and also don't take care of them. Commonly a pet routine includes to have a proper play time , morning/evening walk, food, monthly vaccination etc. which is not done by the pet owner due to lack of time.

Due to this in most of cases the pets are either Abandoned or the owner just tie their pet in a one place for weeks without giving food & water.

III. LITERATURE REVIEW

HoldMyPet connects pet lovers with pet owners just like you in all major cities & can help you get a loving trusted Pet sitter who can board your dogs & cats in moments after you make a request.

VI. CONCLUSION

In this project we have successfully implemented all the features as mentioned in the project planning. We have carefully studied the basic concepts of android, java, xml and php and tried to make use of it to its best potential.

We had aimed to create a community for pet parents, lovers, and pet finder to care for pets and we have achieved our aim with the completion of our app.

We feel happy and proud to serve all the pet parents and pet lovers with our application. We are sure that our application will make a difference and make this world a better place. We now aim to add more features in our application as stated in future scope of application

VII. FUTURE SCOPE

- Improve Application performance and user experience.
- Expanding our services in more cities and urban localities.
- Medical assistance for pets.
- Building a fully functional web-Application.
- End to End security encryption for our users.
- Insurance scheme for pets.
